

Foreword

The parts atlas of series 50 wheeled tractors is compiled according to the existing production drawings and process routes. And the name, drawing No. and use quantity of parts atlas of series 50 wheeled tractors are systematically introduced through intuitive and understandable illustrations and detailed catalogue. It not only can help drivers and repairers know about the tractor structure and assembly relation among parts & components and improve the repair level, but also can provide convenience for selection and purchase of parts & components. The parts and components of the supporting engine and front drive axle are not compiled in the book in detail, and please see the illustrated book for parts and components of engine and the illustrated book for front drive axle provided together with the machine for the relevant detailed contents.

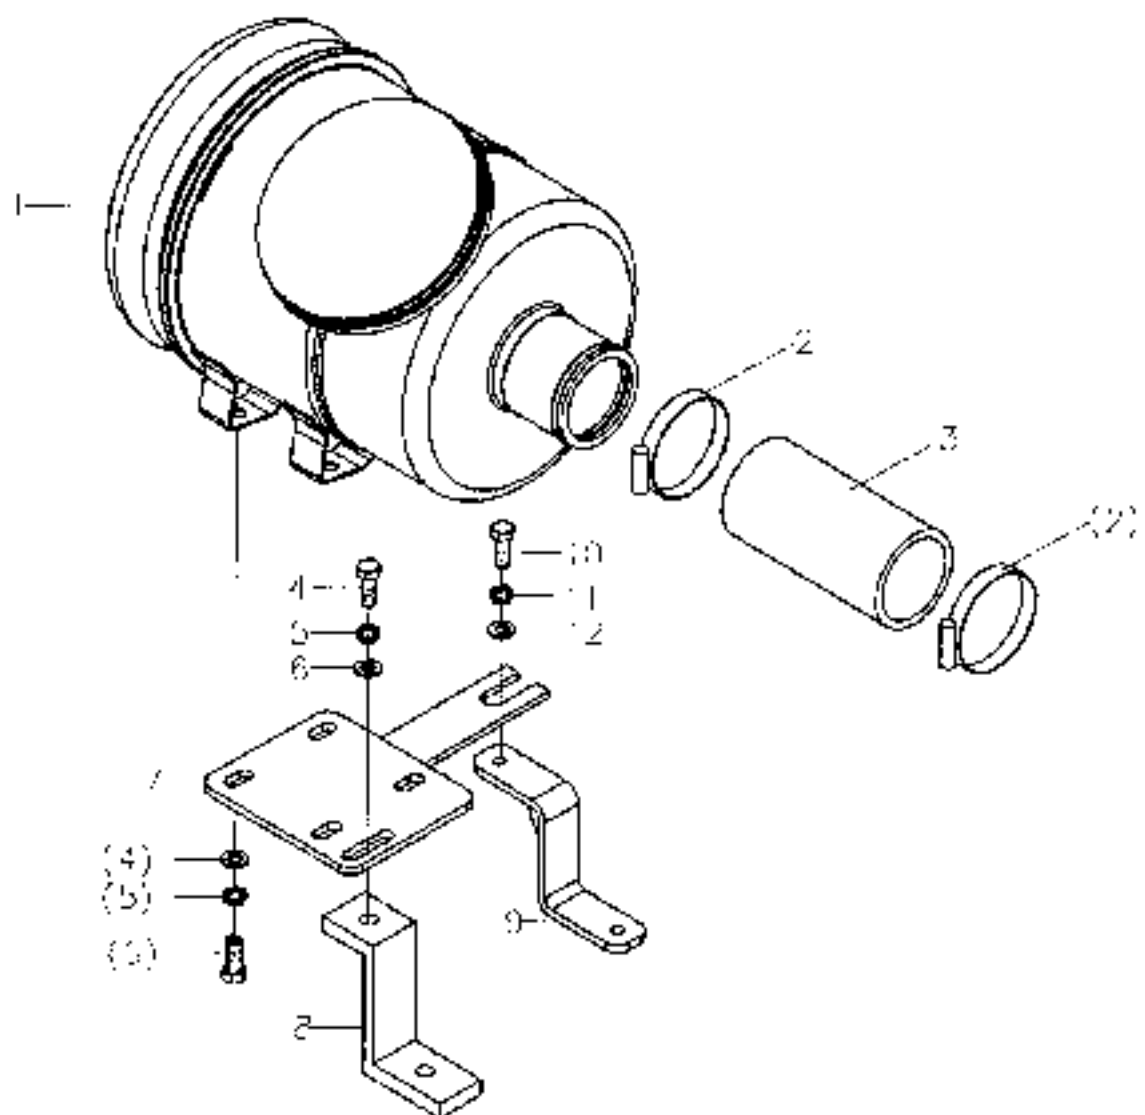

With the continual improvement and perfection of the product, some parts and components of tractor produced in the future may be inconsistent with that in the illustrated book, and it shall be based on the material object of existing tractor products, and please consult local distributors for any doubt. Users shall not put forward any unjustifiable requirements based on the detailed list of parts and components and illustration of parts and components in the book. After product improvement, the contents herein are subject to change without further notice, and the contents will be amended and supplemented when reprint of the illustrated book for parts and components. Sorry for the inconvenience.

If there is any mistake in the book, please point it out for our correction.
